

FUTURE — — PROOF YOURSELF IN NEW — ZEALAND

A world-leading education

In 2017, The Economist Intelligence Unit ranked New Zealand first in the Worldwide Educating for the Future Index.

This ranking was attributed to New Zealand's university-industry collaboration, a future-skills focused curriculum framework and the high quality of our teachers.

In today's fast-changing world, there is a greater need for students to know how to learn, rather than reiterate knowledge. You need skills that are adaptable to ensure you are set up for success in the global workforce.

The World Economic Forum's Future of Jobs Report lists the top three skills that will be needed in 2020 as complex problem solving, critical thinking and creativity.

And that's where New Zealand excels.

Teachers and lecturers in New Zealand place a strong emphasis on creative and independent thinking. Our hands-on style of education and open, free society offer an ideal learning environment where innovation can flourish.

Higher Education

Tertiary students gain internationally-recognised qualifications, global exposure and access to advanced research expertise, labs and technology.

All eight of our state-funded universities rank in the top 3% in the world in the QS rankings, and collectively they rank in the world's top 100 in 39 out of a possible 46 subjects.

Other tertiary study options include Private Training Establishments (PTEs), and Institutes of Technology and Polytechnics (ITPs) which provide high-quality qualifications and training focused on practical skills and hands-on experience.

School

Our school system allows you to personalise your education by choosing from a wide range of subjects. You'll learn in an immersive English language environment, and be given the support you need to feel at home here.

Develop the skills the world needs

As a student in New Zealand, you'll develop vital skills that will make you more employable in the future world.

By learning to think independently and work collaboratively, students in New Zealand become the critical thinkers, problem-solvers and innovators of the future.

Discover a new way to learn

As well as receiving an excellent academic education, you'll have the opportunity to bring your learning to life with hands-on, real-world projects.

You'll be able to talk and think freely in the classroom, develop your own ideas and apply your learning to real-world situations – so you'll be ready to excel at work from the moment you graduate.

Thrive in an open and welcoming society

Our free, open and fair society values curiosity, innovation and caring for people and the world around us. We're small and welcoming, yet globally respected and connected.

Our teachers believe every student has a right to be included, and a right to be heard. You'll be amazed by what you can achieve here.
